CIRM 2020 Grantee Meeting

SAVE-the-DATE

Join us to hear some of the leading scientists in the world talk about their research in developing new treatments, and even cures, for deadly diseases and disorders.

Event date: Sep 14, 2020 to Sep 15, 2020

Event type: Grants Working Group

Event location: Virtual Meeting

Registration: [Click here to register](#)

Join us to hear some of the leading stem cell scientists in the world talk about their research – being done right here in California – and the progress being made in developing new treatments, and even cures, for deadly diseases and disorders.

This research, all of which is funded by the California Institute for Regenerative Medicine (CIRM), targets heart disease and stroke, cancer, diabetes, Parkinson's disease, COVID-19 and many more. You'll hear from the researchers developing these therapies, and the patients who are benefiting from them on Sept. 14-15, 2020.
